Hi!

Developer with 3+ years of experience designing and developing multiple web-based applications, incorporating a range of technologies like JavaScript, PHP, React, Vue, React-Native, GraphQL, API Rest, Axios, MySQL And Laravel Focused on delivering exceptional customer experiences and developing efficient and optimized code. My goal is to find an organization that allows me to apply the knowledge acquired in years of study and work. Being part of a work team and consolidating myself professionally in a company where achievements and personal performance are recognized, in addition to enabling opportunities for personal and professional development.
